NOT ONLY IN CLOVIS

Similar Cases Occur Daily In This Vicinity.

Not only here in Clovis but in our neighboring towns, the same good story is heard. An encouraging instance from Portales is given here, and will be read by us with great interest.

Charles W. Carroll, Box 175, Portales, N. Mex., says: "My kidneys got out of order some time ago and caused me a heap of trouble. My back was so lame and weak, I could hardly bend over. My kidneys were in bad shape and caused me much annoyance. I felt tired out and had no ambition. Mornings I felt unrefreshed. A friend recommended Doan's Kidney Pills and I got some. About four boxes of this medicine cured me, giving me up in A-1 shape."

PUT THE BUTCHER ON HIS TRAIL

Here is a little story well told that we selected from a recent bulletin from the Louisiana State University and Agricultural and Mechanical College. The story reads like this:

"If you sold a steer for \$50.00, and a highwayman held you up and robbed you of \$20.00 of this amount, you would put the sheriff on his trail, and rightly so. No good citizen tolerates a robber."

"Yet, there are hundreds of farmers throughout this country being robbed of this amount on every steer they sell—by scrub bulls. A study of the daily market reports will convince any man that a good purebred bull will add at least \$20.00 in value to every steer he gets, compared to the steers sired by scrub bulls. Put the butcher on the scrub bull's trail." Aberdeen Angus Journal.

SURGEON'S JOB

Collectors of customs, being constantly on the watch for smugglers, have certain demands which they repeat almost unconsciously. Not long ago a tourist came ashore with a badly swollen cheek.

"What have you there?" asked the customs officer, pointing to the swelling.

"An abscess, sir," was the reply.

"Well," said the officer impatiently, "open it please."

UNCLE SAM GETS SLICE OF PURSE IN BIG BOUT JULY 2

Uncle Sam never drew on a boxing glove in his life, but he'll make more money than Jack Dempsey, Georges Carpentier or Tex Rickard on July second.

Figures were quoted recently by internal revenue officials.

Dempsey's income tax for \$300,000 approximately what he will receive for the battle, will amount to \$161,270. Carpentier's toll, when exemptions for his wife and child are subtracted, will total \$93,334.

That makes the score on the division of the purses read:

United States government, \$254,004; boxers, \$245,336.

The marked difference between the taxes of the boxers is due to the surtax on the difference between \$300,000 and \$200,000. Dempsey, however, possesses an advantage in that he will have a year in which to pay in quarterly installments, the first payment due March 15, 1922. Carpentier, before he sails, must pay every dollar.

Government profits on the bout also include the ten per cent amusement tax exacted by federal authorities, which will amount to approximately \$100,000. New Jersey will exact a like sum.

Promoter Tex Rickard, whose profits may be \$100,000, will be taxed an amount which will bring the total government revenue from the encounter to considerably more than a half million dollars.

Some people seem to think they are worth a lot of money because they have it.—Greenville (S. C.) Piedmont.

ELIMINATE LOW PRODUCERS

The greatest need of New Mexico dairymen is better cows. The best way to combat the present low prices of dairy products is to get rid of the poor producers and give better attention to the good producers.

No doubt there are many cows being used for milk production in this state that will not pay for the feed consumed. If the same thing holds true here as in the recognized dairy sections of the country where cow testing associations have determined the exact production of the various

herds, many dairymen would actually make more money if they sold part of their herd and milked fewer cows. They would not only make more money, but they would do it with less work, providing of course, that the cows sold were the poorer ones.

Another advantage of getting the poor cows out of the herd is the fact that heifer calves that must build up the herd will be from good cows only, and if cows or calves are to be sold, those from tested herds where the poor ones have been eliminated, should be worth more money.

The only way to weed out poor producers with certainty is by weighing the milk and if possible, testing it for butter fat. If the milk cannot be weighed daily, it will be worth while to weigh it once a week or even once a month, and from this data estimate the monthly production. To be of real value, the records should extend over a period of one year because short time records do not take into consideration the great difference in the persistency of different cows.

Along with the selection of cows must go the use of a pure-bred bull from a good milk-producing ancestry and a good individual. The bull is more than half the herd—he is the proper individual when it comes to improving the grade herd.
